

VERSION 5.0 i-STEPS INSTALLATION PROCEDURES

Please read all the instructions below before performing them in order. Follow these instructions for each workstation that you propose to install the software.

I. SOFTWARE INSTALLATION

(This section will take about 10 minutes to execute).

1. Create a folder (directory) on your computer's hard-drive such as c:\i5temp.
2. Download Satellite.exe Version 5.0.364 (9,954,816 bytes) into c:\i5temp.
3. From c:\i5temp run SATELLITE.exe
4. If the Microsoft Installer has not previously been installed on the system then you will be prompted to let the machine reboot at this time.
5. Follow the prompts to install Satellite 5.0.
6. When asked to select a Destination Folder, we recommend you install 5.0 Satellite to c:\i-sat5 or [Networkdrive]:\i-sat5.
*** DO NOT use a directory name that contains spaces anywhere in the path.
The default selection is preferable.
7. NOTE: If you choose a folder other than the default, at the end of the install you will be prompted to select the directory where you installed Satellite.
8. Copy the SATELLITE.exe file somewhere for safekeeping. You may remove the c:\i5temp directory at this time.

II. SOFTWARE UPDATE

IMPORTANT: If you are installing an update to Satellite and you have already made changes to your data, you must follow the instructions below to retain your work. Removing the program and re-installing without following those instructions will result in loss of data.

1. Using Windows Explorer, copy the \i-sat5\data folder to another location to save your work. Make sure that your copy includes the data folder and all of the subfolders with their files.
2. Create a folder (directory) on your computer's hard drive such as c:\i5temp.
3. Download SATELLITE.EXE Version 5.0.364 (9,954,816 bytes) into c:\i5temp.
4. From c:\i5temp run SATELLITE.EXE.
5. It will prompt you to select Modify, Repair, or Remove. Select Remove and click Next, then Next, then Finish.
6. When the removal is complete follow the instructions in Section I above starting with Step 3 to install Satellite 5.0.
7. When the install completes, copy the data folder that you saved at the beginning of this section into the i-sat5 folder. Let it overwrite the data folder and files that are there. Your work will now be available in the updated version of Satellite.

III STARTING THE SATELLITE PROGRAM.

1. Run and log in using the username "SAT".
2. Complete the login by typing in the password "LAUNCH".
